

#COP26Norwood

INDEPENDENT

Under the 2015 Paris Agreement, countries agreed to cut greenhouse gas emissions with a view to 'holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels'.

Four key Paris Agreement components:

1. Carbon reduction
2. Adaptation
3. Who will pay
4. Loss and damage

The COP26 summit in Glasgow will bring parties together to accelerate action towards the goals of the Paris Agreement and the UN Framework Convention on Climate Change.

Building a shared plan to respond to the climate crisis

Lambeth held an independent citizens' assembly on the climate crisis, to come together and work towards a consensus on how we reduce the borough's carbon emissions.

13 RECOMMENDATIONS

Transport

1. To reduce the number of journeys made using private vehicles.
2. Organisations across the borough should encourage and enable cycling through development of better cycle routes and cycle storage.
3. Businesses and other organisations in the borough need to take full responsibility to immediately start operating with green transport methods when delivering their goods and services.
4. Lambeth Council should work together with all other key transport actors, and representatives of vulnerable groups, to ensure more vulnerable groups can be supported when any changes to transport in the borough are introduced.

Energy

5. Developers, housing providers (the council and others) and energy providers should be required to improve the energy efficiency of homes in the borough.
6. Lambeth Council should set targets on energy-related emissions in the borough.
7. Energy providers should support and work collaboratively with Lambeth Council on how best to increase awareness.
8. Public sector organisations and big businesses should focus on reducing emissions.
9. Lambeth Council should coordinate a scheme to retrofit homes.

Waste and Recycling

10. Lambeth Council should take the lead alongside big businesses in working with residents and organisations in the borough to minimise waste and increase recycling.

Consultation and Engagement

11. Lambeth Council should collaborate with residents, businesses, community groups and elected representatives to set up a system of ongoing monitoring, engagement and involvement in environmental issues in Lambeth.

Green Spaces

12. Green spaces should be created and reclaimed for communities to use in promoting biodiversity and food growing.

Central Government

13. Taxation measures should be considered to encourage businesses in the borough to operate in an environmentally friendly way.

Deadline to comment on these recommendations: 14 November

Reduce

Reduce the amount of the
Earth's resources that you use

Reuse

Don't just bin it, could
someone else use it?

Recycle

Could the materials be made
into something new?

is simply using less:
less packaging
less energy
less car journeys
and - more repairing

AIR POLLUTION AND HOW IT AFFECTS YOU

LONDON'S TOXIC AIR IS A DEADLY PROBLEM.

Air pollution contributes to thousands of early deaths each year and it affects the day-to-day life of many more who suffer from the long-term illnesses it causes. Particulate air pollution (PM2.5) was estimated to be responsible for 6.4% of all adult deaths in the London region in 2019.

THE YOUNG AND THE OLD ARE MOST VULNERABLE.

Maternal exposure can result in premature and low birth-weight babies. Inhaled tiny carbon particles have even been found in mothers' placentas. Children living in highly polluted areas of London are more likely to have reduced lung growth. In old age a lifetime of exposure can result in reduced life expectancy, and increased risk of stroke and heart attacks.

LINKS TO ASTHMA, HEART DISEASE, STROKES AND LUNG CANCER.

There are also suggested links to brain and breast cancers, diabetes, dementia, impaired memory, reduced ability to learn, poorer exam performance, mental health problems including bipolar disorder and schizophrenia, depression and teenage psychotic episodes.

My five-year-old son is one of many London children affected by air pollution. He's been to hospital 12 times with breathing difficulties, two of his attacks were life threatening. All London's kids should be able to grow up healthy.

AIR POLLUTION WHAT YOU CAN DO ABOUT IT

STOP BURNING WOOD

It causes more particulate matter (PM2.5) air pollution in the UK than traffic. Bonfires, fireplaces, fire pits, DEFRA approved eco-stoves and even the newest Eco Design stoves all release harmful levels of particulates into your and your neighbours' homes.

WALK, CYCLE, SCOOT - DON'T POLLUTE!

Ditch the car for short trips to school and the shops. For longer journeys use public transport or a bike. Did you know pollution inside a car can be more than three times higher than outside?

WALK AWAY FROM THE KERB

As a pedestrian, the closer you are to the traffic, the higher the pollution levels. Keep as far from the road as you can, especially when waiting at crossings, and try to walk down quieter streets with less traffic.

NO IDLING

Turning your car engine off whenever you pull over is a really easy way to stop polluting the air, and it saves fuel.

RETHINK ONLINE DELIVERIES

Collect deliveries from a local shop rather than get them delivered to your home, as this cuts down the amount of courier driving. Most courier vans are powered by diesel which is far more polluting than either petrol or electric. Better still, shop locally on foot and by bike.

ELECTRIC CARS

If you have to have a car, ensure it is the least polluting option. Diesel cars are much more polluting than petrol cars. Electric cars do not pollute from the exhaust pipe, but they still emit particulate matter (PM2.5) through tyre, brake and road wear.

TRY CAR-SHARING

London has a large network of cars which can be rented by the minute, hour or day. Drive to your destination and leave the vehicle there, no need to take it back home or pay while you're not using it. Easy to book, cars are often brand new, insured, include fuel and increasing numbers are electric.

WHAT IS AIR POLLUTION?

It's a mix of particles and gases that harm you when you breathe them in. Particulate matter (PM2.5) is one of the most dangerous pollutants, it's made up of tiny particles of soot and dust. Gases, like nitrogen dioxide, are emitted by (mainly diesel) vehicles.

Turn something old and
useless into something new
and useful
How? Where? What?

FROM HOME

Paper and card:

- newspapers and magazines
- card and cardboard
- toilet and kitchen roll tubes
- egg boxes
- junk mail
- catalogues

Plastic, glass, cans and cartons. Please rinse all food and drink packaging:

- plastic bottles - leave the lids on
- plastic packaging - such as tubs and food trays (but not plastic film)
- glass jars and bottles - put metal lids in separately
- cans and tins
- liquid food and drink cartons

VALE STREET

- aluminium foil
- batteries
- bicycles
- books
- water filters
- car batteries
- cardboard and paper
- carpet (not underlay)
- CDs
- clothes
- cooking oil
- DVDs
- electrical items
- engine oil
- engine oil
- fire extinguishers (empty)
- food and drink cans
- food and drink cartons
- garden hand tools
- garden waste (vegetation only - no logs)
- gas bottles
- glass bottles and jars
- hard plastics
- lightbulbs and tubes
- mobile phones
- printer cartridges
- scrap metal
- shoes

General

- Thin plastic lids of all types
- Kitchen towel, toilet roll, nappy bag, cotton wool wrappers
- Pouches – microwave rice, pre-cooked mussels, petfood, etc
- Fruit & veg nets, bags and wrappers
- Plastic sauce sachets

Bags

- Ordinary carrier bags
- Bread bags
- Crisps, nuts, snacks bags
- Bags from:
 - Cereal and porridge
 - Dried goods – dried fruit, pasta, rice, sugar, pulses, etc
 - Frozen foods and ice cubes

Wrappers & Film

- Chocolate and sweets bags and wrappers
- Biscuit wrappers
- Cling film
- Bread product wrappers:
 - Croissants
 - Pancakes
 - Naan bread
 - Pitta bread
 - Garlic bread
 - Fresh pasta
- Wrappers from:
 - Cheese, pastry, cakes, Yorkshire puddings
 - baby wipes, etc
 - Meat, poultry and joints
 - Tea and teabags, ground coffee, etc
 - Pies, pastries, sausage rolls,
 - Household textiles, scourers, rubber gloves, etc
 - Giftwrap, greetings cards, etc
- Flower wrappers
- Petfood wrappers

OUR ENVIRONMENT

Incredible Edible Walking Trails West Norwood and Gipsy Hill

Peabody Hill

Incredible Edible LAMBETH

These two trails take you on a voyage of discovery around the many green spaces and secret outdoor spots in West Norwood and Gipsy Hill. On the map we have highlighted places for children to play and enjoy Nature, places to grow food, places to eat and places to sit. We hope it enables you to connect with your local community and get growing!

Incredible Edible Lambeth is a network of food growers, food entrepreneurs and food activists all working to improve our communities.

Our motto is 'If you eat, you're in' ... it's that simple, everyone can get involved with us - join our network today by signing up to become a member at www.incredibleediblelambeth.org/join.

Membership is free and you will immediately be linked in with hundreds of other growers, green spaces, allotments, gardens, parks and more throughout the borough.
